

53 % of employees working in open-space office floors report being bothered by ambient noise*

*Source: survey by TNS/Sofres for Actineo

Soundproofing and insulation

Average values obtained with suspended ceilings and carpeted floors, values may vary between different office environment.

Acoustic partition screens

Profiled aluminium frame 42 mm thick. Fabric covered acoustic partition screens are composed of 2 layers of fabric applied to strips of insulating and sound absorbing foam. Glazed sections made from toughened safety glass. Configuration of 2, 3 or 4 screens in line, or in variable angle layouts thanks to plastic connector elements (sold separately). Adjustable stabilizer feet. The number of stabilizer feet required is determined by the screen layout configuration (refer to diagram for guidance). Optional accessories can be fitted to the median section of mixed screens: Pueblo accessories (see page 56). Height: 160 cm (from stock) and 200 cm (on request).
